

Abstract

My procedural cure explains and identifies the drug and drugs role in bringing about a cure for brain tumors. It is a natural grown drug that has been chemical changed by me. This changed drug now becomes destructive to a tumor's abnormal chemistry, I have included the amount in weight of such a drug, the timing and duration of timing of its use along with other pertinent information so as to make the treatment tailored to each patient for such a cure.. Existing medical equipment mention, to be staffed by qualified personell. This procedure does not need invasive surgery or radioactive substances for tumor cures. I have included an alternative procedure in the event my brain procedure does not work on other body tumors or as well, such as matastasis ones. I have explained how such a cure may come about, in correlating this alternative to my original procedure.
